

# 25<sup>th</sup> Anniversary AGRC Celebration

## Video Documentary

This fall we will be celebrating the 25th anniversary of the Alfred Gessow Rotorcraft Center. As part of the celebration a short video/documentary is being put together to commemorate this event. The video will highlight research achievements and projects of the rotorcraft center over the past 25 years, past graduate students in action around the center and where they are now, and accomplishments of Alfred Gessow through his career.

I am asking everyone to dig through their old filing cabinets and search through their hard drives to find anything from old pictures of people from the rotorcraft center, to pictures of old labs and experimental setups, to windtunnel tests, to video footage of past experiments. The more the better! This is an important milestone for the center, so it would be nice to capture everything that has been going on here the past 25 years.

I, Nick Wilson, am working together with Nicole Roop to compile all of this footage, so please contact me when you have found material to contribute to this documentary. If you only have a few still frame images then you can simply email them to me in an attachment with some background information about the picture. Thank you for your help!

Here is an example of what we envision to final product to look like: [http://www.youtube.com/watch?v=4sPsa16\\_bmw](http://www.youtube.com/watch?v=4sPsa16_bmw)

### Footage Examples

- Pictures/Videos of Alfred Gessow
- Early days of the center
- How the center evolved thru the years
- Research done at the center
  - windtunnel, acoustic, smart structures, CFD
- Grad students & Profs in action (in lab or classroom)
- **The more the better!**
